TRU Seal

For Immediate Release

Taylor Products Releases Innovative Ultrasonic Valve Bag Sealer

Taylor Products, division of Magnum Systems, announces the release of the TRU Seal ultrasonic valve bag sealer. The TRU Seal has been specifically designed to work with Taylor valve bagging equipment and incorporates the latest ultrasonic sealing technology.

- Ultrasonic waves alter molecular structure of sealing agent without heat which reduces product degradation
- Rigid mount set-up at filling source decreases amount of bag movement while maintaining bag shape
- Ultrasonic waves displaces product from seal area providing a clean positive seal
- Helps prevent product loss during shipping
- Capable of both plastic and paper valve sealable bags
- Works well with dusty, fluid, powder, and hydroscopic products

Taylor Products, division of Magnum Systems, is a leader in material handling, weighing, filling, and packaging equipment. For over 50 years Taylor Products has provided customers with versatile, cost effective, packaging equipment, and continues this trend today.
