TAYLOR PRODUCTS ADDS INNOVATIVE V5100 BALING MACHINE TO THE V-LINE FAMILY OF PRODUCTS

Taylor Products, a division of Magnum Systems, is pleased to announce the release of the V5100 baling machine into the V-LINE family of products.

This unique vertical form fill seal style baling machine packages finished bags of product into film wrapped bales, eliminating the need for cardboard boxes, pre-made bags, and paper bales. The baler is capable of one, two, and three columns of product with a maximum bale weight of 60 lb. The V5100 is designed to be integrated with other V-LINE products to complete your packaging process.

The V5100 standard features include:

- 1, 2, and 3 columns
- Maintenance-free pneumatic system, easy access design
- Simple, yet durable pneumatic film advance system
- Allen Bradley PLC control and touch screen operator interface

The V-LINE is a complete line of vertical form fill seal packaging machines. From the economical and compact V1100 to the full featured V4200 the V-LINE has it all. The line includes nine models with a complete line of auger fillers, volumetric cup fillers, scales and pumps to package granules, powders and liquids in both supported and

unsupported films. Operational bagging speeds up to 100+ bags per minute with package weights from grams to 100 pounds are possible.

Taylor Products, a division of Magnum Systems, is a leader in material handling, weighing, and packaging equipment. For over 50 years Taylor Products has provided customers with versatile, cost effective, packaging equipment, and continues this trend today.
